

CURRICULUM VITAE

Name: Rosalia BERTORELLI

Citizenship: Italian

Office Address: In Vivo Pharmacology Facility
Istituto Italiano di Tecnologia (IIT)
Via Morego, 30, 16163 Genoa, Italy

LANGUAGES Italian, English

EDUCATION

- | | |
|------|---|
| 1989 | Post-graduate degree (PhD equivalent) in Pharmacology -
Mario Negri Research Institute – Milan-Italy |
| 1985 | MSc in Biological Sciences -
University of Milan-Italy |

EXPERIENCE

2018- Present Technologist
In Vivo Pharmacology Facility, IIT

2014- 2017 Technologist,
D3, Drug Discovery and Development,
PharmaChemistry Facility, IIT

- Member of Cystic Fibrosis Group study to discover new potential therapeutic drugs
- Studies on genetic models of autism.
- Assessment of efficacy of drugs and drug delivery systems in animal models of diseases related to wound and burn healing models in rodents, in collaboration with the Smart Materials Department at IIT. Exploration of new therapeutic opportunities.
- Studies on drug delivery system in several models of chronic pain
- Evaluation of acute and chronic toxicity of nanomaterials and drugs in rodents
- Pharmacokinetic (PK) determination of drugs and drug metabolites in blood and tissues
- Establish and maintain collaboration inside and outside the IIT
- Member of Animal Welfare Committee

2014- 2015 Researcher,
D3, Drug Discovery and Development,
PharmaChemistry Facility, IIT

- Assessment of efficacy of drugs and drug delivery systems in animal models of diseases. Initial studies performed using wound healing models in rodents, in collaboration with the Smart Materials Department at IIT. Exploration of new therapeutic opportunities.
- Evaluation of acute and chronic toxicity of nanomaterials and drugs in rodents
- Pharmacokinetic (PK) determination of drugs and drug metabolites in blood and tissues
- Establish and maintain collaboration inside and outside the IIT
- Member of Animal Welfare Committee

2009 - 2014 Team Leader *In vivo Pharmacology*
D3, Drug Discovery and Development, IIT

- Responsible of *In vivo* pharmacology Unit with the aim to develop *in vivo* animal models of pain (acute and chronic pain, such as neuropathic and inflammatory pain) and neurodegeneration (learning and memory for the treatment of Alzheimer's disease). Pharmacokinetic/Pharmacodynamic (PK/PD) and basic toxicity (TK) studies (planning and study design, preparation of samples).
- Responsible for the management and supervision of direct reports and their professional development.
- Project Leader to develop new treatments and devices for wound healing and contact dermatitis.
- Member of several cross-functional teams to design and develop new pharmacologically active compounds.
- Member of Steering Committee for Animal facility.

2001 – 2009 Section Leader Neuropharmacology
Schering-Plough Research Institute, San Raffaele Science Park, Via Olgettina, 58,
20132 Milan, Italy

- Head of Neuropharmacology Unit with the aim to develop *in vivo* animal models of pain (acute and chronic pain, such as neuropathic and inflammatory pain). PK/PD and basic TK studies (planning and study design, preparation of samples)
- Responsible for the management and supervision of direct reports and their professional development.
- Project leader of multidisciplinary teams of scientists (from chemistry, biology, and toxicology) to develop new pharmacologically active compounds on different molecular targets and across diverse therapeutic indications. Validation of novel targets for pain. Member of International Project Teams.

1997 – 2001 Principal Scientist

Schering-Plough Research Institute, San Raffaele Science Park, Via Olgettina, 58, 20132 Milan, Italy

Setting up *in vivo* animal models of disease. Area of interest: Parkinson's disease. Main responsibility was to design, establish and progress the identification of new therapeutic application and new developable ligands for the treatment of Parkinson's disease. One molecule was developed up to Phase III (PRELADENANT) for Parkinson's disease treatment. On June 2013, Merck discontinued the studies for lack of efficacy compared to placebo.

1993 - 1997 Senior Researcher

Schering-Plough S.p.A., Research Laboratories – Pharmacology, Comazzo, Milan

Setting up *in vivo* animal models of disease. Areas of interest: epilepsy, sleep disorders, neurodegeneration, cerebral ischemia. Head of a small group of scientists.

1991

INSERM - Institute of Pharmacology and Endocrinology

Montpellier, France

Studies on G-protein regulation in C6 cells (1 published paper)

1989-1990

Department of Pharmacology

Karolinska Institute

Stockholm, Sweden

Upgrade on microdialysis technique (1 published paper)

1986-1992

Post-graduate Course and Postdoctoral Fellowship

Mario Negri Research Institute, Laboratory of Cholinergic System

Milan, Italy

Studies on interaction between cholinergic and dopamine, serotonin, and noradrenaline systems. Involvement of the peptide galanin in the modulation of cholinergic system. During this period, 18 papers were published in International Journals

SCIENTIFIC EXPERTISE

In disease areas such as:

- Pain (Acute and Chronic)
- Parkinson's disease
- Cerebral Ischemia
- Depression
- Epilepsy
- Sleep Disorders
- Respiratory disorders
- Wound healing/contact dermatitis

- In neurotransmitter systems such as:
- Excitatory Aminoacids
 - Central Monoamines
 - Neuropeptide families
 - Cytokines
 - Cannabinoids/endocannabinoids

PROFESSIONAL SOCIETIES

Società Italiana di Farmacologia
 Società Italiana di Neuroscienze
 International Association for the Study of Pain
 Associazione Italiana per lo Studio del Dolore
 Society for Neuroscience

Reviewer for International Journals, such as Eur. J. Pharmacol, Br. J. Pharmacol, Neurosci Lett., Peptides, Brain Res., Eur J Pain, Physiol Behav.

Reviewer in evaluation process of proposals to be funded for the Michael J. Fox Foundation (MJFF) for Parkinson's disease, and for ANR, the French National Research Agency.

UNIVERSITY COURSES AND MENTORING ACTIVITY

- Lecturer in the PhD Courses in Drug Discovery.
- Invited Speaker at several Meetings and Universities/Centers
- Supervisor/tutor of BSc, MSc and PhD students

OTHER COMPETENCES

Establish and maintain frequent contacts and interactions with key persons of the Italian Ministry of Health and Istituto Superiore di Sanità for the preparation and discussion of experimental protocols in compliance with European law on animal research.

Maintain frequent contacts with key persons of Italian Ministry of Health for the use of controlled substances for experimental use and subsequent preparation of documents and records reporting their experimental usage.

Broad experience as Member of the Committee for Animal Welfare, with a leading role in: 1) Supporting and refining the research methodology to reduce and ultimately replace animals with alternative procedures, wherever possible (following the 3R's: Replacement, Reduction, and Refinement); 2). evaluating and approving the proposal studies, in collaboration with the Veterinary and the Animal Facility Manager, before sending the projects to the Italian Ministry of Health for

the final evaluation: 3) establishing guidelines and procedures in compliance with the European laws for research animal welfare.

FULL LIST OF PUBLICATIONS

More than 70 papers published on refereed journals or books.

PATENTS

Title: The use of 1,2,4-Triazolo(1,5-c) pyrimidine heterocyclic analogues for the preparation of medicaments useful for the treatment of cerebrovascular disturbances

Inventors: Ongini Ennio, Adami Marina, **Bertorelli Rosalia**

Title: Novel Lantipeptide

Inventors: Iorio Marianna, Maffioli Sonia, Monciardini Palo, Sosio margherita, Donadio Stefano, **Bertorelli Rosalia**, Sasso Oscar, Reggiani Angelo.
